PROJECTS

Unanimity

As the primary front-end developer, I implemented the architecture. Generating an attractive user interface (UI) and a simple user experience (UX) created harmony through words.

- Constructed an API that retrieved data from Firebase
- Converted CSS to SCSS to maintain cross-browser support
- Handled data manipulation by displaying messages in order
- Implemented Redux state for a single source of truth
- Added engaging animations to keep users interactive

Technologies: *React, SCSS, Axios, Redux, Firebase, Heroku*

SwiftFoods

Was responsible for the design and implementation of the user interface (UI)/user experience (UX) for the web application. Make time for things that matter by only spending two minutes cooking!

- Added session-based authentication with Passport
- Implemented Stripe to take valid card numbers for payments
- Constructed an API that communicated with the client/server
- Database integration with MongoDB for faster load times
- Debugged errors when deploying to Heroku

Technologies: MongoDB, Express, React, Node, Heroku
